

Verbal to Non-verbal**Q.6. A2. Verbal to Non-verbal: 05**

Read the following statements and prepare a chart of

Do's' and Don'ts'. Suggest a suitable title for it:

Nature is abode for all of us. It provides us with all our basic needs. However, we must take care of the following things so that our mother nature is not harmed.

We must plant more trees.

We should not cut trees.

We must keep our area neat and clean.

We should never discharge garbage without proper management.

We should not pollute air and water.

We should not use plastic bags.

We should not hunt birds or animals.

We should use more of public transport.

We should spread awareness about the importance of maintaining balance in nature.

How to take care of our Mother Nature'

Do's	Don'ts
*plant more trees. *keep area neat and clean. * use more public transport. *spread awareness about the importance of maintaining balance in nature.	* Don't cut trees. *Don't discharge garbage without proper management. *Don't pollute air and water. *Don't use plastic bags. *Don't hunt birds and animals.

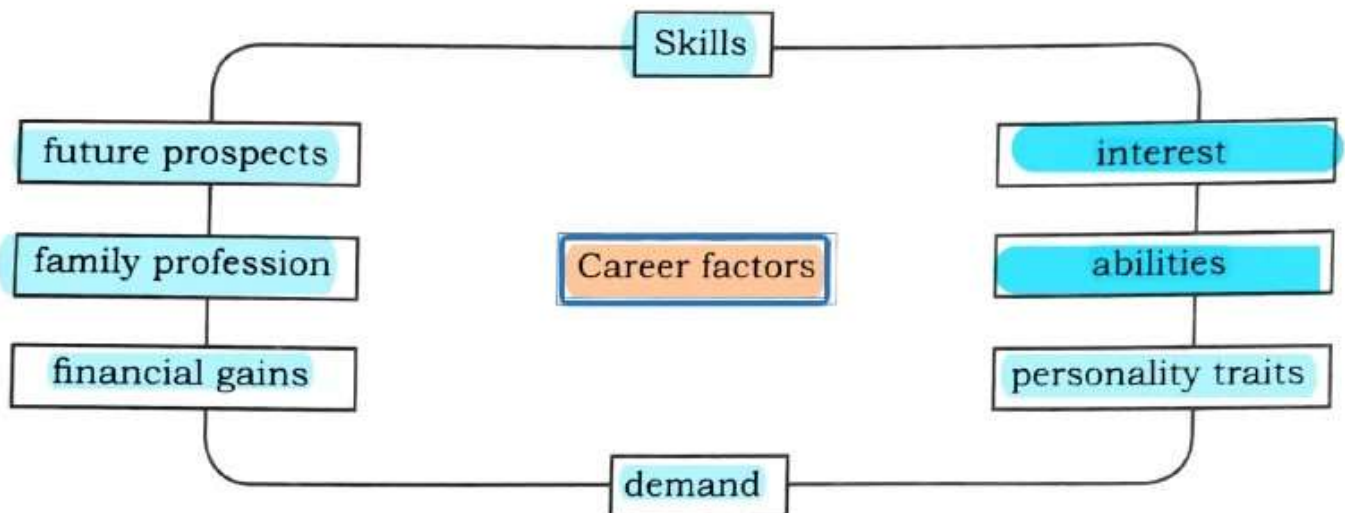

Non-verbal to verbal

Q.6. (A) Information Transfer:

AI or A2. Do any ONE of the following:

A1. Non-verbal to verbal: (5 marks)

The following diagram shows important factors to be considered while choosing a career. Write a paragraph based on it. Give a suitable title to it.

ANS-

Important Career Factors

Choosing a career is a big decision and while choosing a career we have to give importance to some valuable points. Earlier it was the parents, teachers and other siblings who largely influenced our career choices but remember we should not just enter one area because our friends or siblings have picked it up. We should listen to our heart, understand what we are really interested in. See if we are good abilities to fulfil and then only look forward. Also considered the demand of your professionals, in the market, so your future will be secured. Without demand of particular education skill, you will not successes in your career.

Though you have good skills in particular profession but now it is outdated then you will not get success. For example if you have good skills in shorthand but now this course is not in demand as it replaced with computer technology, you will not get opportunity to show your skills. When your choose particular profession always see your personality abilities.

Choosing a career can be daunting task. Sometime our family professions are in our blood so it is a good choice vise, versa it may be a bad choice too. Whatever the career you select it should gain profit and financial stability in future. You should assess your skills and interest, study the market and consult an experienced person before making a final decision and be secured.

(13) Read the following paragraph and complete the table by putting in correct information. Suggest a suitable title.

While preparing to plant trees in a residential colony, highways or anywhere, one should consider three factors taking decision. What kind of (species) trees, where to plant and what kind of soil. He should consider the qualities of a tree such as pattern of branching and its height. If it is a school, you need shade-giving trees of moderate height so that children can play under them and not be hurt when they climb on to them.

In residential colonies, trees with thick branches, like eucalyptus or Ashoka should be chosen to control pollution and trap dust. Similarly, the nature of the soil too should be considered. If you are planting trees by the road side, it withstands the topical monsoon and provides shade in summer.

On highways the well-known choice would be the native trees tamarind or peepal. Being hardly, they do not need much care. Birds and animals interact more easily with native trees than the exotics. Villagers too consider such native trees to be sacred as the abode of gods.

Title:

Kinds of trees	Where to plant	Uses
1) Shade-giving (short trees)		a) Children climb and play b) Enjoy shade of a tree
2) (tall trees)	Residential colonies	a) b)
3)	Rode side	a) Withstand the wind b)
4) (native trees)		a) Birds and animals interact more with the native trees. b) Villagers consider them sacred.

Q. 6 B1. Information Transfer (Non-verbal to verbal)

1) The table given below shows features of an iPhone and an iPad. Develop a paragraph based on the information given. You may begin as iPhone is basically a smartphone, whereas ———

iPhone	iPad
☐ Smartphone	tablet PC
☐ <u>small screen 3.5 inches</u>	<u>9.7 inch screen</u>
☐ <u>allows to make and receive calls</u>	cannot make calls
☐ <u>can view videos but on small screen</u>	good to view videos
☐ <u>difficult to operate</u>	allow better computer work
☐ quite different from	closer to net-books and laptops

TANVEER SOLKAR

Features of an iphone and an ipad

An iphone is basically a Smartphone, **whereas** ipad is a tablet PC. The screen of iphone is small, only 3.5 inches **but** ipad has 9.7 inch screen. An iphone allows the user to make and receive calls **whereas** ipad doesn't have this facility. One can view videos on iphone but on small screen only. **On the contrary**, ipad is good to view videos as its screen is much bigger than that of the iphone. An iphone is difficult to operate **while** an ipad allows better computer work. Iphone is quite different from netbooks and laptops but ipad is closer to netbooks and laptops.

2) Write two paragraphs about similarities and differences on City life and Village life.

	City life	Village Life
Surroundings	factories, vehicles	clean, open fields
Houses	big, skyscrapers, cement	small, mud walls, thatched roof

Traffic	thick	thin
Air	polluted, impure	fresh and healthy
People	educated, few illiterate	illiterate, few educated
Profession	service	agriculture
Language	urban, polished	rustic, rural

CITY LIFE AND VILLAGE LIFE

City life is crowded with factories and vehicles but village life is clean. There are open fields in villages. Houses are big and skyscrapers in city whereas they are small in village. Houses in city are made of cement but they are made by natural things in villages. Traffic is very thick in city while it is thin in village life.

Air is polluted and impure in city but it is fresh and healthy in village life. People in city are educated and few illiterate. But we find many people are illiterate and few educated in village. Many people do service as their profession whereas main occupation in the village is agricultural itself. People use urban and polished language in city life on the other side people use rustic and rural language.

3) Write two short paragraphs about Mr. Shah and Mr. Patel who are different in some aspects still they are good neighbours.

No.	Aspects	Mr. Shah	Mr. Patel
1)	Age	40 years	46 years
2)	Qualification	B. Com.	M.B.B.S.
3)	Profession	A clerk	A Doctor
4)	Nature	Kind and social	Narrow minded
5)	Hobbies	Playing chess	Gardening
6)	Family	Big but happy, 7 members	Small, 4 members
7)	Native place	Baroda	Surat
8)	Vehicles	Bajaj M-80	Hero-Honda

Mr. Shah and Mr. Patel: Two neighbours

Both Mr. Shah and Mr. Patel are good neighbours. They help each other in their need. They are neighbours for about 10 years. Mr. Shah is 40 years old and Mr. Patel is 46 years old. The qualification is different. Mr. Shah is B. Com and he works as a clerk. But Mr. Patel is M.B.B.S. who does practice in his own clinic. There are differences in their nature. Mr. Shah is kind and social by nature whereas Mr. Patel is narrow minded.

Mr. Shah likes to play chess while Mr. Patel spends lot of time in his garden. Gardening is his hobby. Mr. Shah has big family. There are seven members in his family. Mr. Patel's family is short. There are four members in his family. Mr. Shah's native place is Baroda while Mr. Patel's native place is Surat. Mr. Shah has Bajaj M-80 and Mr. Patel has Hero Honda.

Comparatively, Mr. Shah is more kind and social than Mr. Patel.

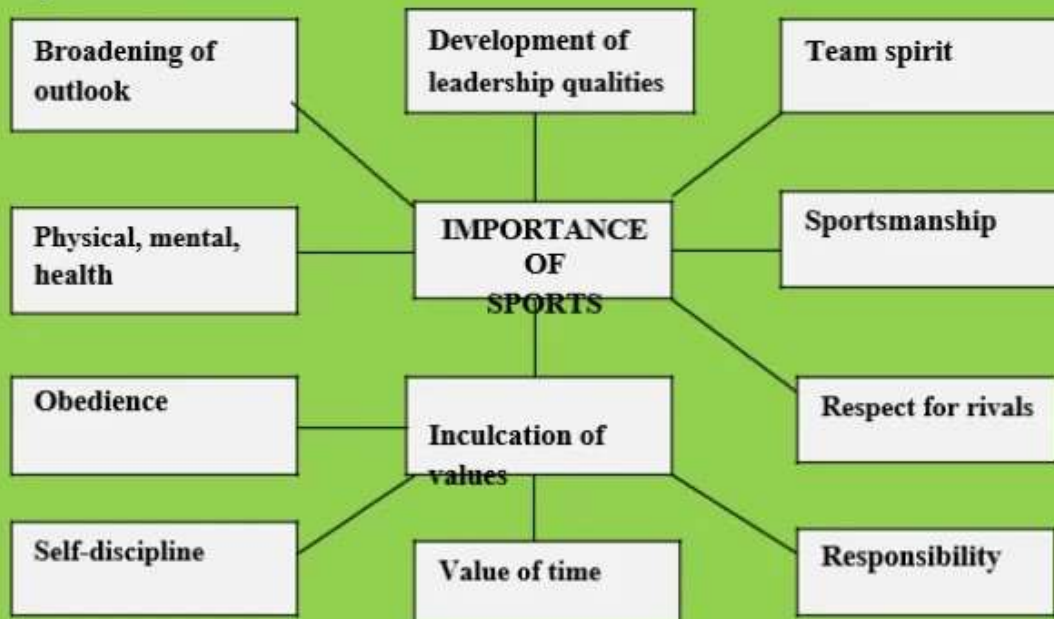

4)Write two short paragraphs giving information about the two seasons- Summer and Rainy seasons.

Description	Summer	Rainy Season
Duration	February to may	June to September
Climate	Hot and tiresome	Cool and fresh
Effect on human being	Feeling sleepy and uneasy	Sometimes catch cold and fever
Nature	Bare and barren	Greenery everywhere
prevention	Using fans, goggles, sun-coats, red umbrellas	Using rain- coats and umbrellas.

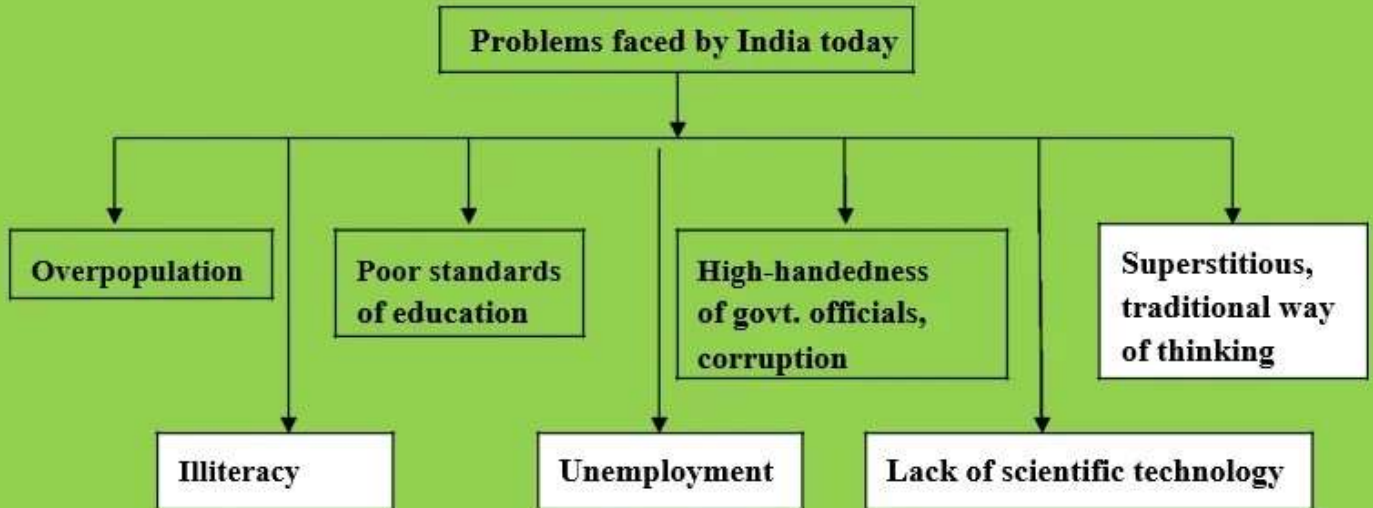

5) Write a paragraph on 'A Drug Addict' using a map given below:

6) Develop a short paragraph on the 'Importance of Sports' with the help of the points given in the map below:

7) Write a paragraph on 'Problems faced by India today', using a 'map' of the type given below:

8) Write a paragraph on 'Failure of students' using the diagram.

□ Tree diagram:

1) Prepare a tree diagram by using given information about vitamins: (March -2014)

There are in all four types of vitamins: Vitamin A, B, C and D. You will get vitamin A from milk, butter and eggs. Vitamin B is derived from meat and eggs. Fruits and vegetables will provide you with Vitamin C. Vitamin D can be obtained from fish-oil and of course, sunlight. A lack of any of the above four vitamins may cause certain diseases and ailments. Lack of Vitamin A may result in blindness. Insufficiency of Vitamin B gives rise to disorders of the nervous system. A deficient supply of Vitamin C can cause skin diseases. Bone diseases are likely to occur in the absence of Vitamin D.

Ans.

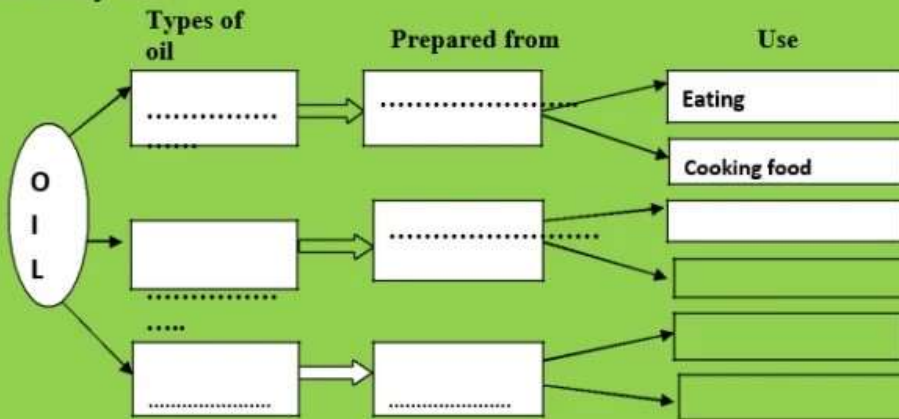

2) Read the following passage carefully and prepare a tree diagram.
(Sept.2014)

Oil is necessary in the nutrition of our body but the excess use of oil should be avoided. There are three types of oils. We use groundnut oil, vegetable oil and mineral oil in our diet. Groundnut oil is prepared from groundnuts which we use for eating. Groundnut oil is used in cooking food.

Vegetable oil prepared from vegetable seeds. Vegetable oil is used in manufacturing of soaps, medicines and scents, etc.

The third type of oil is mineral oil which is obtained from the crust of the earth. Mineral oil is very useful. It is used for driving machines. It is used in the industry also.

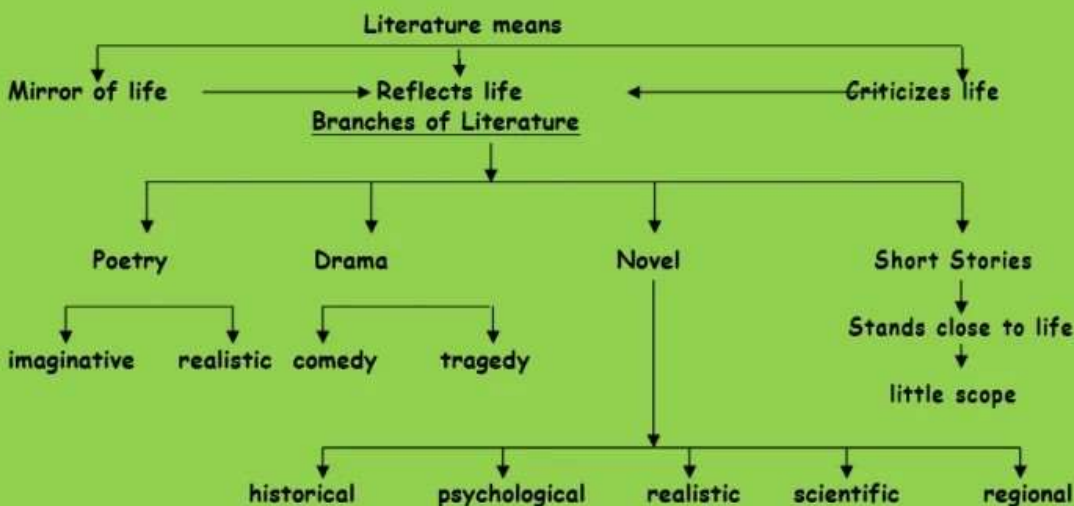

3) Draw a tree diagram to represent the following:

The word 'Literature' is really hard to define. Many interpretations are made about the word. But all are incomplete. Some opine that literature is the mirror of life; some others say that it is the criticism of life. Whatever may be the controversy about the word, we may say that literature is that which reflects life. The branches of literature are poetry, drama, novel and short stories. Poetry is of two kinds, imaginative and realistic. Drama is either a comedy or a tragedy. Novels are also of many kinds, historical, psychological, realistic, scientific and regional. Short story is that one which stands very close to life in spite of a little scope.

Ans.

Literature and its forms

4) Read the following paragraph and prepare a tree-diagram.

Books can be categorized as literature, expository, philosophical and reference. Literature books entertain. Expository books inform. Philosophical books are meant for deep thinking. Reference books are to be referred. Books on literature include stories, plays, and poetry. Expository books are on history, geography, politics and sociology. Religion and Theology form the subjects of philosophical books while dictionaries, collection of idioms, books on world records and books on facts and figures form the books on reference.

5) Draw a tree diagram to represent the following:

There are many different kinds of musical instruments. They are divided into three main classes according to the way that they are played. Some instruments are played by blowing air into them. These are called wind instruments. Some of these are said to be of the woodwind family. Examples of woodwind instruments are the flute, the clarinet and the horn. There are also various other wind instruments such as the mouth-organ and the bagpipes. Some instruments are played by banging or striking them. Instruments like this are called percussion instruments. The last big groups of musical instruments have strings. There are two kinds of stringed instruments. Examples are the harp and the guitar, the violin and the cello.

6) Read the following paragraph and complete the tree-diagram putting the correct information.

There are different kinds of fuels. Broadly they can be divided as solid, liquid and gaseous fuels.

Solid fuels include substances such as wood, coal and coke. Most liquid fuels are obtained from oil wells sunk deep into the earth. Petrol, kerosene and diesel are all separated from petroleum. The most important gaseous fuels are natural gas, coal and water gas. Natural gas is a fuel that is widely used for cooking and heating.

7) Read the extract and draw a tree diagram giving the main points and supporting details.

There are basic different between the large and small enterprise. In the small enterprise you operate primarily through personal contacts. The large enterprise you have established 'channels' of organization and fairly rigid procedure. In the small enterprise, you have moreover, immediate effectiveness in a very small area, you can see the effect of your work and of your decision right away, once you have risen a little in position. In the large enterprises even the man at the top is only a part in a big machine. To be sure his actions affect a much greater area than the action and the decisions of the man in the small organization, but his effectiveness is remote, indirect and elusive. In the small business you are normally exposed to all kinds of experiences and expected to do a great many things without much help or guidance. In the large organization you are normally taught one thing thoroughly. In the small one the danger is of becoming a jack of all trades and master of none. In the large it is of becoming the man who knows more and more about less and less.

9) Draw a tree diagram that contains the main points and important supporting details from the following text about 'Diagnostics Technique'.

In the early 1950's ultrasound was first used in diagnostics. It has become inseparable from medical diagnostics. Ultrasound consisted of harmless sound waves as against the harmful X-rays.

In the early 1980 and 1990's with the advent of two new diagnostic techniques C.T. scan and magnetic Resonance Imaging techniques allowed the doctors to visualize on neat cross section of the patients body, which was not possible earlier MRI also allowed neat imaging of blood vessels such as cerebral vessels C.T. (Computerized Topography) uses the very same injurious X-rays while MRI is prohibitively costly. C.T. scan is expensive too.

By the 1990, ultrasound was mainly viewed as non-injurious and low cost but a low-tech imaging technique which allowed visualization of only select views of the human body.

TANVEER SOLKAR

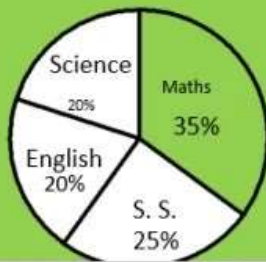

Pie-chart**1) Read the following paragraph and prepare a pie-chart by putting in correct information. Result of Preliminary Examinations of Standard Tenth**

Just in the second and third week of the month of January 2014, our school has conducted the preliminary Examination of standard tenth. We aim for 100% result in the final Board Exam, but in the preliminary Exam only in Marathi and Hindi 100% students have passed.

The result of Mathematics is the worst. Most students mean 35% students have failed in this subject. In Social Science also more students could not perform well. 25% students have failed in Social Science. They have performed same in English and Science. 20% students couldn't pass in English as well as in Science.

Still they have two months to study. If the failed students study hard, they will be passed in the final exam. The teachers are making efforts to help them clear their difficulties and to make them study harder. Let's hope will lead us to 100% results.

Ans. Title: Result of Preliminary Examinations of Standard Tenth

2) Given below is the performance of the students of X in the first unit test.**Prepare a pie chart depicting the information.**

In all, 100 students appeared for the unit test. Of these, 22 students failed in Mathematics and 28 did not make the grade in English. 20 students failed to do well in Science and 15 did not get passing percentage in Geography. Altogether 5 flunked in History. The maximum failures were in Science. The least failures were in History. More students failed in English than in Mathematics.

3) Draw a pie- diagram to show the information.

One medium baked potato of a little more than 6 gms. In weight, without salt, is rich in proteins. It contains about 49 percent, i.e. about 3000 mg of proteins. It also contains about 38% of fibre that helps in digestion. Besides these nourishing substances, it contains of 10% potassium (K). 2% of its contents includes other minerals such as Mg, Ca, Na, Fe, Se, Zn and a few others. Only 1% of the potato contains vitamins and a substance called folate. Thus the potato is high on proteins but very low on vitamins.

4) Prepare a pie diagram based on the given information.

The government has allotted the highest amount of funds (30%) to agriculture schemes. The next is education; amount of fund is 26%. The government has taken care of the National Health Service also. The fund is allotted to it 20%. Defence spending seems to be low with only 12%. The last amount of 5% has been allotted to housing. The remaining 7% has been left for other areas.

5) Prepare a pie diagram showing the percentage of energy source of a country with the help of following paragraph.**Sources of Energy**

Energy is consumed in different forms in different proportion. In India there are several sources of energy. Among all the sources of energy, the majority of energy sources is oil which is almost 39%. Almost 24% of energy is obtained from natural gas. Coal energy contributes 23% of all resources. A small amount of 8% is nuclear energy. The least source of energy is 6% that of hydroelectric, solar and other sources.

Table (Tabular Form)

(1) Draw up a table of comparison (tabular form) between Mumbai and Pune that includes the information given in the following paragraph:

Both Mumbai and Pune are important cities of Maharashtra. While Mumbai is the capital city,

Pune is the capital in terms of cultural and educational activities. Mumbai's population exceeds one crore whereas Pune's population has only recently crossed 25 lacks. In Pune, mostly Marathi is spoken. Mumbai being a cosmopolitan region, besides Marathi, Hindi and Gujarathi are also widely spoken. The climate in Mumbai is hot and humid. Pune tends to be cold. Mumbai is the seat of the film industry in India. Pune is known for its education and culture.

Title: Comparison between Mumbai and Pune

Points	Mumbai	Pune
Capital	Capital city of Maharashtra	Capital in terms of cultural and educational activities
Population	Above one crore	Recently crossed 25 lakhs
Languages spoken	Marathi, Hindi and Gujarathi	Marathi
Climate	Hot and humid	Warm and cool
Special features	The seat of the film industry in India	Known for its education and culture

(2) Read the following paragraph and complete the table by putting in correct information. The occurrence of mangroves is largely limited to the regions between 30° north and south of the Equator. The few mangroves out of this area worth mentioning are in the North up to the Bermudas (32.20°N), Japan (31.22°N) as well in the South, in Australia (38.45°S), New Zeland (38.03°S and the East Coast of South Africa (32°59'S). There are two center of mangrove diversity—the—Eastern group (Australia, Southeast Asia, India, East Africa and the Western Pacific) where the total number of species is approximately 40 and the Western group (West Africa, Caribbean, Florida, Atlantic South America, pacific North and South America) where the number of species is only eight. According to estimate made by F.A.O/UNDP a total area of 7.1 million hectares is covered under the mangrove formation in the world.

Ans. Title: The occurrence of mangroves

Sr.	Clues	Information
1.	Location of regions	North and south of the Equator; North-up to the Bermudas, Japan; South-Australia, New Zealand, East coast of South Africa
2.	Mangrove covered areas	Eastern group (Australia, Southeast Asia, India, East Africa and the Western Pacific); Western group (West Africa, Caribbean, Florida, Atlantic South America, pacific North and South America)
3.	Centre of mangrove diversity	Eastern group and Western group
4.	Approximately no. of species found at two centres	40 in the Eastern & in the Western group
5.	Estimating agencies	F.A.O/U NDP
6.	Total area covered	7.1 million hectares

(3) Read the following passage and complete the following table:

Dialect is a form of a language spoken in one area which may be different from other forms of the same language. Each language has dialects which change every few kilometers.

India is a multi-lingual country. Each state follows its own language as official language. For example, Marathi is the official language of Maharashtra, while Ahirani, Wharadi, Konkani, and Malavani are its dialects. Several languages in India are spoken but do not have any script. In Karnataka, Kannada is the official language. Tulu is spoken in Karnataka but has no script. In England English is the official language while Scottish, spoken in Scotland and Welsh spoken in Wales dialects of English.

State	Official Language	Dialects	Spoken/without script
Maharashtra	Marathi		
Karnataka			
England			

(4) Given below is a paragraph about Mother Nature is different from human beings. Read the paragraph carefully and tabulate the information under two headings: Mother Nature and Human beings:

Difference Between Mother Nature and Human Beings.

There are huge differences between Mother Nature and Human Beings. We have to understand that Mother Nature is definitely *in charge of every situation*. Human being act according to their whims. Mother Nature *follows fixed rules and regulation*. Human beings create their own to suit their own convenience. Whereas Mother Nature is very *generous and unselfish* and is *never greedy*, human beings are possessed of all these qualities. Mother Nature is *a wise teacher*. Human beings can be quite unreasonable and lacking in commonsense at times. Nature *creates a world full of greenery where animals and birds abound*. Man destroys all this and constructs concrete jungles. *Nature's world is eco-friendly* whereas man's world could hardly be called that.

Title:

Mother Nature	Human Beings

(5) Read the following paragraph and complete the table by putting in correct information.

The area of Maharashtra is 3,07,713 sq km. Mumbai is the capital city of Maharashtra. The regional language is Marathi. There are a number of big and small rivers like Godavari, Krishna, Bhima, Koyana etc. flowing in Maharashtra. Jowar, bajra and sugarcane are the main crops of this state. Mumbai, Nagpur, Aurangabad, Nasik are the major cities of Maharashtra. Karnataka is the neighbouring state of Maharashtra the area of which is 1,19,791 sq. Bangalore is the capital city of this state while Kannad is the regional language. The Tungabhadra and the Cauvery are two main rivers while important crops are jowar, tea and rubber. Mangalore, Hulbi, Dharawad and Mysore are the major cities of Karnataka.

(7) Given below is a paragraph about ‘Types of soaps and their uses.**Draw up a table that****includes the information given below.**

Various types of soaps and detergents are available in the market. We select them according to their suitability to serve our purpose. Toilet soaps and detergents are available in the market. We select them according to their suitability to serve our purpose. Toilet soaps are used for bathing. They do not injure the skin. Shaving soap is used for shaving. It softens the hair on the face. Shampoo soap or liquid is used for washing hair. It gives much lather. Deodorant toilet soap contains a small amount of germicide. It removes bad odour from the body. Detergents having germicide properties are used in hospitals for cleansing purposes.

(8) Complete the table given with the information from the passage:

There are four different types of soils. They are laterite soil, sandy desert soil, black cotton soil, and alluvial soil. The formation of laterite soil takes place due to the washing of silica, salt, organic matter and ‘accumulation of sesquioxides’. Sandy desert soil, on the other hand is formed due to the action of winds. Mechanical weathering of igneous rocks leads to the formation of black cotton soil. Last but not the least is the rich alluvial soil that is obtained through the depositing process of rivers.

Soils

Nos.	Types of Soils	Formation
(1)	Laterite soil	the washing of silica, salt, organic accumulation of sesquioxides’
(2)	Sandy desert	the action of winds
(3)	Black cotton soil	Mechanical weathering of igneous rocks
(4)	Alluvial soil	Depositing process of rivers.

(9) Prepare a weather report based on the given information. You may make table of three columns Day, Average Temp., Weather:

On Sunday it was warm and the temperature was recorded 300C. On Monday it was again warm and average temperature was 250C. The remaining days of the week were hot. On Tuesday it was cool and average temperature 250C. On Wednesday it was hot and temperature was 400C. On Thursday it was hot and temperature was 420C. On Friday it was hot again and temperature was 440C. Saturday was highest/hottest day of the week because it was recorded as 450C temperature.

(10) Given below is a paragraph about our City Life and Village Life in India. Prepare a table depicting the information.

India is a big Asian country. It is a developing nation. Nearly seventy percent citizens live in villages. Now a day, India is facing the problem of fast urbanization. Most of the Indian cities are surrounded by small and big factories. As agriculture is the main occupation in the Indian villages, they are surrounded by fields and meadows. Indian villages hardly face the problem of heavy traffic. Air pollution is a big danger in cities. Villagers enjoy fresh and clean air. Houses in villages are small and having mud walls. We find tall cement buildings in cities. Villagers live in a very simple lifestyle whereas people living in cities have adopted modern life-style and speak polished language. Villagers speak rural language. People living in cities earn their living by doing business, jobs. Farming is the main source for earning living for villagers.

Title:

	City/Urban Life	Village /Rural Life
Surroundings		
Houses

(11) Read the following paragraph and complete the table by putting in correct information. Suggest a suitable title.

Tomato is strictly a fruit, because it is an ovary with seeds. However, since it is not sweet and is eaten along with the main course of meal, it is classified as a vegetable. Most tomatoes are picked before fully ripe. Tomatoes benefit the heart and keeps blood pressure in control.

Tomato is grown from the seeds of other tomatoes. Tomatoes need plenty of warm sunshine, but not more than 35 C. The soil has to be rich in organic matter and should have sufficient calcium. Tomato plants need adequate supply of water per day. Tomatoes take about two to three months to grow. They have to be picked before they are fully ripe. Potato is a tuber crop. Potatoes contain resistant starch and fibre.

Potato is grown from the 'eyes' of other potatoes. Potatoes grow in cool climate. Potatoes grow in average soil. The soil should be fertile and well-drained. Potatoes take about four to five months to grow. They have to be picked before they are fully ripe. Potatoes are dug out of the soil.
